European NF Conference 2026 - Abstract Submission Topic List

Basic Science

- AI and Big Data in Neurofibromatosis Type 1 and Schwannomatosis Research
- Basic and Translational Research in Neurofibromatosis Type 1
- Basic and Translational Research in Schwannomatosis
- Basic Biology underlying Neurofibromatosis Type 1 and Schwannomatosis
- Bone & Orthopaedic Aspects of NF1
- CNS Tumours in Neurofibromatosis Type 1 and Schwannomatosis
- Genetic Aspects of Neurofibromatosis Type 1, Schwannomatosis and Related Disorders
- Genomics and Bioinformatics for Neurofibromatosis Type 1 and Schwannomatosis
- Malignant Progression from Neurofibroma to MPNST
- New Therapeutic Developments - Future Clinical Trials and Clinical Trial Design - Preclinical Drug Development
- Patient Involvement in Research and Clinic
- Preclinical Models for Neurofibromatosis Type 1 and Schwannomatosis Pathogenesis
- Miscellaneous

Clinical Science

- Bone & Orthopaedic Aspects of NF1
- CNS Tumours in Neurofibromatosis Type 1 and Schwannomatosis
- Cutaneous Manifestations in Neurofibromatosis
- Genetic Aspects of Neurofibromatosis Type 1, Schwannomatosis and Related Disorders
- Imaging in Neurofibromatosis / SWN
- Malignant Progression from Neurofibroma to MPNST
- Neuropsychosocial Implications
- New Therapeutic Developments - Future Clinical Trials and Clinical Trial Design - Preclinical Drug Development
- Patient Involvement in Research and Clinic
- Rare Manifestations
- Schwannomatosis (incl. Pain, Hybrid Tumours, etc.)
- Miscellaneous

At the time of the abstract submission, the submitter must select one single topic to index the abstract.

It is important to carefully select the best matching topic as this choice will determine under which area the abstract will be reviewed and graded.
